

Practical science exam
Primary 5

Exp (1)

In front of you some Materials ,examine them then classify it into transparent . Semi-transparent and Opaque

(Clear glass – Air – Tissue paper – Carton paper – Aluminum foil – water – forested glass)

Transparent	Semi-transparent	Opaque

1- Light can easily pass through -----

2-Light can not never pass through-----

=====

Practical science exam
Primary 5

Exp (2)

In front of you some Materials ,examine them then classify it into Magnetic materials and non-magnetic materials

(Copper – Iron – Glass – Wood – Nickel – Cobalt – Steel – plastic)

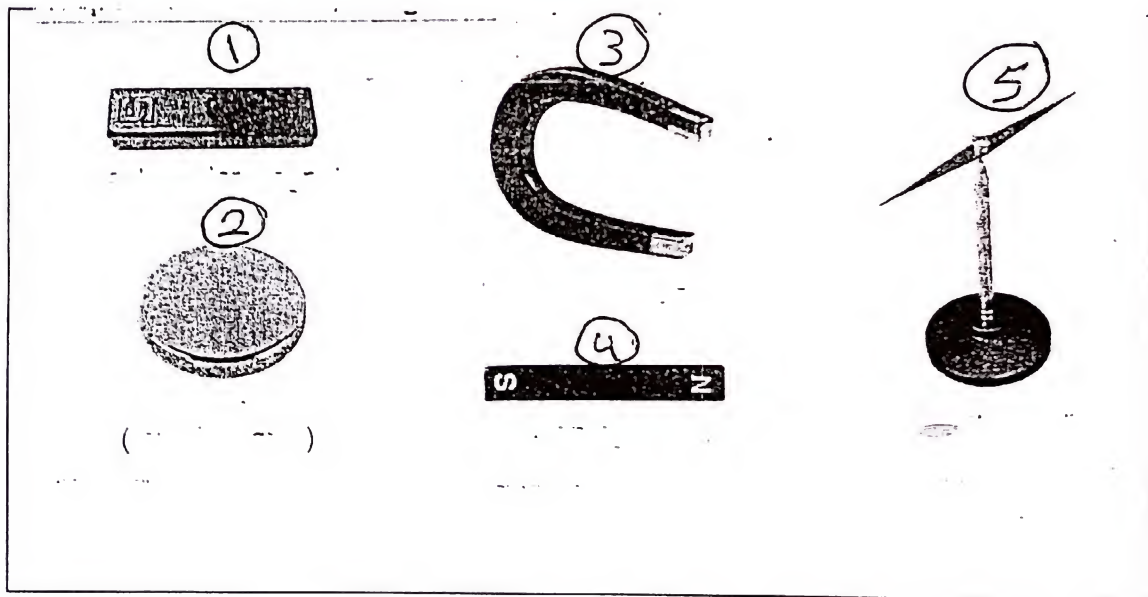

Magnetic materials	Non - magnetic materials

**Practical science exam
Primary 5**

Exp (3)

**In front of you some shapes of artificial magnet classify them
and write the name of each shape**

1-No (1) Point to -----

2-No (2) Point to -----

3-No (3) Point to -----

4-No (4) Point to -----

5-No (5) Point to -----

7-The substances that are attracted to magnet are called -----
such as -----, ----- and -----

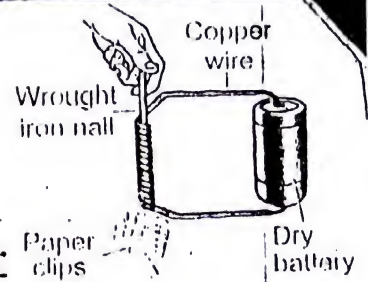

8-The substances that are not attracted to magnet are called -----
such as -----, ----- and -----

Name / -----

Class/-----

NO /-----

Primary 5

Exp (4)

In front of you a model examine them and answer

- 1-The name of model is the -----
- 2-It is used to change ----- energy into ----- energy
- 3- It is used in ----- and -----
- 4-The substances that are attracted to magnet are called ----- such as -----, ----- and -----
- 5-The substances that are not attracted to magnet are called ----- such as -----, ----- and -----

Practical science exam
Primary 5

Exp (5)

In front of you a mixture examine them and answer

- 1-This mixture consists of ----- and -----
- 2-You can separate this mixture by -----
- 3-Mixture can mixed by -----, ----- and -----
- 4- Mixture can be separated by -----, ----- and -----

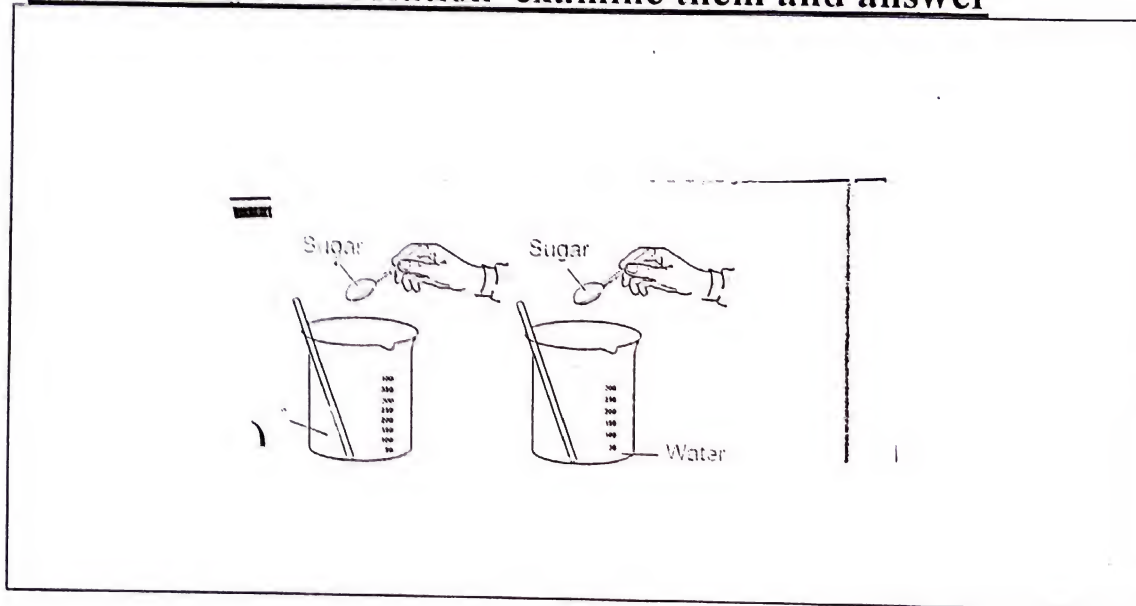

Practical science exam
Primary 5

Practical science exam
Primary 5

Exp (5)

In front of you a solution examine them and answer

- 1-The solution consist of ----- and -----
- 2- ----- is considered be general solvent
- 3-from the factors affecting the dissolving process are -----
, ----- and -----
- 4-Increasing ----- reduce solubility time

Name / -----

Class/-----

NO /-----

Exp (6)

In front of you a solution examine them and answer

- 1-The solution consist of ----- and -----
- 2- ----- is considered be general solvent
- 3-from the factors affecting the dissolving process are -----
, ----- and -----
- 4-Increasing ----- reduce solubility time

Practical science exam

Primary 5

Exp (6)

In front of you some picture of internal and extern parasite
examine them then classify it into internal and external
parasite

(Mosquitoes – Lice – Flaria worm – Fleas – Ascaris
worms – Tape worms - Bugs – Liver worms - Ticks)

Internal parasitism	External parasitism
